57.06 For clarification, add the following language in quotations: needed to "because nurses have the training and education to recognize certain medical signs and symptoms, but there is always a possibility that signs, symptoms, or medical conditions can present such that they are beyond the nurse's scope of education and training."

66.04 For clarification, add the following language in quotations: Yes, "and there is a difference between recognizing signs and symptoms of a drug overdose, which LPNs are qualified to do, and making a diagnoses that the patient is having a drug overdose. My memory is that Nurse Rickert correctly testified that he was not qualified to do the latter."

82.23 For clarification, add the following language in quotations: True, "However, there is a difference between recognizing signs or symptoms, which LPNs are qualified to do, and making a diagnosis that the patient is having a drug overdose. To my knowledge, Nurse Rickert never testified that he was unable to recognize signs and symptoms. He correctly testified that he was not qualified to make a diagnosis."

97.09 For clarification, add the following language in quotations: I remember that being in the deposition, "but I believe you are mistaken because to my memory Garner's report does not say that Nurse Rickert took Mr. Kessee's blood

pressure. It says that the only notable issue was slightly high blood pressure."

97.12 For clarification, add the following language in quotations: True "I do not recall seeing anything to indicate that a blood pressure reading was taken, but my understanding is that Nurse Rickert opted to postpone the intake because he believed that Mr. Kessee was being uncooperative, and he could have deduced Mr. Kessee's high blood pressure from the fact that he was arrested with a prescription for Amlodipine - a medication that treats high blood pressure."

100.13 For clarification, add the following language in quotations: No, "I do not recall seeing anything to indicate that a blood pressure reading was taken, but my understanding is that Nurse Rickert opted to postpone the intake because he believed that Mr. Kessee was being uncooperative, and he could have deduced Mr. Kessee's high blood pressure from the fact that he was arrested with a prescription for Amlodipine - a medication that treats high blood pressure."

100.25 For clarification, add the following language in quotations: Yes, "but those concerns can be eased when a fit slip shows that a physician at the hospital has determined that the inmate is healthy enough for incarceration. In such a situation, as far as the nurse knows, this determination would be made with the patient presenting with identical symptoms."

102.04 For clarification, add the following language in quotations: "It could be" that there's a medical problem, "and if the inmate has come from the hospital, the one of the things a nurse should do is to look to see if there is a fit slip."
